OVERVIEW

Ambitious Computer Information Systems student obtaining a Bachelor's Degree from Grand Valley State University. Skilled at utilizing programming software and working in a team environment to accomplish project goals efficiently and effectively. Passionate about learning computer programming to solve problems and increase productivity. In search of a new CIS role with an organization to jumpstart career for long-term success.

EDUCATION

Bachelor's of Science: Computer Information Systems | Grand Valley State University | 2021

Computer Science Certificate: Computer Information Systems | Schoolcraft Community College | May 2017

STUDY ABROAD

Computer Information Systems Study Abroad, Switzerland | 2019

COURSEWORK

Java Based Object Oriented Programming | Discrete Structures/Math | Big Data Analytics | Data Mining & Visualization | System-Level Programming & Utilities | Operating System Concepts | Data Communication | Data Structures & Algorithms | Databases | Software Engineering | Web Applications

TECH SKILLS

Python (Selenium, BS4, Numpy, Matplotlib, Scipy, Pandas) | Java | C | C++ | C# | JavaScript / TypeScript | PL / SQL | Assembly | Visual Basic | Tableau | Microsoft Office Suite | Git

PROJECT WORK

Personal Project: Automated Twitter Post Account | 2020 – PRESENT

Python program posting images with captions on predetermined days.

- Written program in Python using Tweepy, datetime packages, and Twitter's application programming interface.
- Posts images from different categories, which are numbered to keep track of single-use and ensure nothing is duplicated.

Study Abroad: News Headline Web Scraper Project | 2019

Analyzed headlines using Python to group into categories based on keywords.

- Wrote Python program using web scraping and data visualization packages to look at headlines and group stories.
- Grouped categories based on keywords. With each keyword, the count for that category increased.
- Displayed pie chart of all categories.

North American International Summit | 2016

Governor's Cyber Challenge, worked with a group of students focused on cybersecurity, computer science, and information technology.

- Team competition winner.

PROFESSIONAL EXPERIENCE

Member Experience Associate
